Software & Cloud

About me

I am a mid-level technology professional with a strong foundation in software development. I have deep experience in full-stack development using React.js and Django, mobile banking application development with Flutter, and cloud-based application delivery on Microsoft Azure. I am proficient in modern development practices, including Git/GitHub, Docker, and agile project management using Jira and ClickUp.
I also bring practical experience in data visualization and analytics, having built and deployed interactive dashboards using Metabase and Apache Superset, including embedding and integrating dashboards into web applications for data-driven decision-making. Additionally, I have hands-on experience with Google Play Store publishing and end-to-end application management, including release and deployment processes.

Work experience

CORE Banking & Digital Applications Officer
Since July 2025 Ahadu Bank Addis Ababa, AA, Ethiopia

- Data Visualization
- CORE Banking System
- Database Management
- Front-End Development
- Google Play Store Management
- Mobile Banking Application Development
- SACCO System Open Source Software Customization.

Software Engineer
Apr. 2023 - July 2025 Brothers IT PLC Addis Ababa

Mobile & Web Application Development

- Proficient in full-stack web development using React.js (frontend) and Django (backend).
- Experienced in mobile application development with Flutter, building cross-platform apps.
- Skilled in designing, developing, and maintaining production-ready applications from concept to deployment.
- Knowledgeable in API design, integration, testing, and deployment best practices.

DevOps

- Tasked with setting up and managing CI/CD pipelines, version control (Git/GitHub), and collaborative development workflows.
- Experience with containerization using Docker and deployment automation.
- Familiar with monitoring, logging, and optimizing application performance across environments.
- Strong understanding of system administration, network configuration, and security best practices from earlier systems engineering roles.

Data Analysis & Visualization Creation

- Hands-on experience building insightful, interactive dashboards using Metabase and Apache Superset.
- Skilled in embedding analytics dashboards into web applications for operational and strategic reporting.
- Capable of transforming complex data into clear visual stories to support decision-making.
- Strong analytical mindset backed by experience in data processing and interpretation.

Cloud Infrastructure Management

- Experience deploying and managing applications on Microsoft Azure, including integrated services and resource provisioning.
- Skilled in managing cloud-based environments with a focus on scalability, security, and performance.
- Familiar with virtual machines, container services, storage solutions, and identity management in cloud ecosystems.

Skills

Programming languages

- C++, Javascript, Java, Dart

Frameworks and Libraries

- React, Next, Nest, Django, and Flutter.

Other skills

- Metabase, Superset, Postgres, Git, Scrum/Agile, Jira, Clickup, Docker, Virtualization, Azure, MySQL, CI-CD, Cisco IOS

Personal Skills

Adaptability

Communication

Problem Solving

Attention to Detail

Teamwork and Collaboration

Education

Bachelor of science in Computer Engineering

Oct. 2017 - Apr. 2023 Bahir Dar Institute of Technology Bahir Dar, AM, Ethiopia

During my computer engineering degree program, I developed strong skills in C++, Java, Python, data structures and algorithms, software engineering, and computer networks. I also honed my abilities in software documentation preparation, team collaboration on projects, and various essential soft skills.
